PROJECTS

[ItemStore](#) (e-commerce website): HTML | CSS | JAVASCRIPT

Item Store is a online shopping site was made as a part of the course web programming assigned to me. I learned various features about JavaScript and css.

[Social-Spark](#) : HTML | CSS | JAVASCRIPT | PHP

This application was made with HTML, CSS, PHP and Javascript using PHPMyAdmin and this app shows the resemblance of a social media website.

[Online-Voting-System](#) : HTML | CSS | JAVASCRIPT | PHP

This app was developed with HTML.PHP and Javascript for a college project. The LocalDatabase PHPMyAdmin was also used in this project.

[ATM](#) : HTML | CSS | JAVASCRIPT

Atm is a demonstration of a real Atm with features like register, login, deposit, withdrawal and show account info.

[Snakes and Ladders](#) : HTML | CSS | JAVASCRIPT

This is a game similar to a real snakes and ladders game played by two player and follows all the rules of the game.

[Listings](#) : HTML | CSS | JAVASCRIPT

This application shows table consisting of data which can be updated deleted or added with JavaScript.
